Document Viewer for Linux

Complete User Guide & Feature Manual (macOS Preview Clone)

Version 1.4.0 | Updated: 2026-10-20

Quick Start Guide (5 Simple Steps)

1. 1. Open File or Folder
   Click Open (Ctrl+O) to load PDFs or images. Click the arrow to open photo folders.
2. 2. Navigate Pages
   Open the sidebar (Ctrl+B) to browse thumbnails. Use arrow keys or Page Down to scroll.
3. 3. Markup & Annotate
   Click Markup (Ctrl+Shift+A) to access pens, highlighters, shapes, text, and signatures.
4. 4. Adjust & Crop
   Use Rectangular, Oval, or Lasso selection to crop (Ctrl+K). Press Ctrl+Alt+C for color grading.
5. 5. Save & Export
   Press Ctrl+S to save edits. Choose File > Export (Ctrl+E) or Export as PDF (Ctrl+Shift+E).

Troubleshooting, Common Errors & Support

Common Error Messages & Quick Fixes

Error: Document is Password Protected

Cause: The PDF file is encrypted with AES-128 or AES-256 security.

Fix: Enter the required document password in the password dialog prompt.

Error: Unsupported Image Format

Cause: The file format or extension is corrupted or unsupported.

Fix: Ensure the file is a standard PDF, PNG, JPEG, TIFF, BMP, or WebP format.

Error: Cannot Crop: No Selection Active

Cause: Crop was clicked before drawing a selection marquee.

Fix: Click the Selection tool, draw a marquee on the page, and then press Ctrl+K.

Error: Cannot Save: File is Read-Only

Cause: File permissions prevent overwriting the existing file on disk.

Fix: Click File > Duplicate / Save As New Copy... to save your work to a writable directory.

Error: Printer Not Found

Cause: No physical or virtual printer queue is registered in CUPS.

Fix: Verify your system printer settings or choose Export as PDF instead.

Frequently Asked Questions

Q: How do I open multiple images together?

A: Click the arrow next to Open and select Open Folder of Images. All supported images load into the sidebar.

Q: How do I rotate an upside-down page?

A: Press Ctrl+R to rotate 90° clockwise, or Ctrl+L to rotate counter-clockwise.

Q: Can I crop oval or freehand shapes?

A: Yes. Open the Selection dropdown on the Markup toolbar, pick Oval or Lasso, select the area, and press Ctrl+K.

Q: Why does my file name show '· Edited' with a dot?

A: The dot and edited badge indicate unsaved changes. Press Ctrl+S to save your work.
